- 4. Location of water source and septic/waste water system.

Mitigation Measures:

Mitigation is an action required of a shoreland property owner designed to compensate for shoreland buffer lost to impervious surfaces within the Shoreland Protection District.

In circumstances where nonconforming structures are permitted to be expanded or reconstructed within the Shoreland Buffer Resource Zone, the Development Review Board (DRB) shall require the shoreland property owner to create and adhere to an approved mitigation plan.

Measures which may be included in such a plan are as follows:

- **Buffer Restoration**. Returning mowed or cleared areas to a naturally vegetated state with supplemental planting of appropriate native vegetation in order to restore the lakeshore buffer. **Must be part of the approved mitigation plan.**
- Rain Gardens.
- Implementation of erosion and stormwater runoff controls. Creating runoff capture and building infiltration structures to prevent stormwater runoff from reaching the lake.
- Removal of nonconforming or obtrusive accessory structures within the shoreland setback area.
- Additional site specific requirements can be determined by the Development Review Board before final plan approval, based on a review of site conditions and the need for any special buffer area protection or restoration measures.

Please provide the DRB with your proposed mitigation plan. Suggestions and descriptions of various mitigation measures are available from the Zoning Administrator or on-line at www.greensborovt.org/zoning.

Conditional Use Criteria:

At your DRB hearing, you will be asked to present your proposal. Please be prepared to address the impact of your project based on the following criteria.

"The DRB shall make its findings on general and specific standards. Such general standards shall require that the proposed conditional use shall not result in an <u>undue adverse effect</u> on the following:

- 1. The capacity of existing or planned community facilities; (e.g. schools, police and fire service, etc.);
- 2. The character of the area affected, as defined by the purpose or purposes of the zoning district within which the project is located, and specifically stated policies and standards of the Town Plan (e.g. why your project is consistent with other uses in the area or how your project fits in with existing development);
- 3. Traffic on roads and highways in the vicinity;
- 4. Bylaws and ordinances then in effect;
- 5. Utilization of renewable energy resources.

Specific standards shall include:

- 1. Minimum lot size shall be that which is required for the district in which the use occurs unless other standards are given for conditional use lot size in the district in question;
- 2. Setbacks for conditional uses will be the same as for permitted uses unless other standards are given for conditional use setbacks in the district in question.
- 3. Landscaping and/or fencing may be required for commercial and industrial uses to provide screening when in the judgment of the DRB such screening is necessary to protect the character of the area affected.
- 4. Exterior signs shall conform to the following in all districts:
 - (a) No free standing internally lit signs shall be permitted
 - (b) All signs shall be compatible in size, materials, and workmanship to the area in which they are located.
- 5. Location on the lot, of structures and service areas shall be compatible with other structures in the area affected.
- 6. In each district, uses are given specific criteria. In all cases these criteria will be adhered to.
- 7. Noise, air pollution and effects on the character of the neighborhood shall be considered."

(Page 36 in the Greensboro Zoning By-Laws).

Variance Criteria:

"The DRB may grant a variance and render a decision in favor of the appellant only if all of the following facts are found, and findings are specified in its written decision.

- 1. There are unique physical circumstances or conditions, including irregularity, narrowness, or shallowness of lot size or shape, or exceptional topographical or other physical conditions peculiar to the particular property, and that unnecessary hardship is due to these conditions and not to the circumstances or conditions generally created by the provisions of these regulations in the neighborhood or district in which the property is located;
- 2. Because of these physical circumstances or condition, there is no possibility that the property can be developed in strict conformity with the provisions of these regulations and that the authorization of a variance is necessary to enable the reasonable use of the property;
- 3. The unnecessary hardship has not been created by the appellant;
- 4. The variance, if authorized, will not:
 - a) Alter the essential character of the neighborhood or district in which the property is located;
 - b) Substantially or permanently impair the appropriate use or development of adjacent property;
 - c) Reduce access to renewable energy resources;
 - d) Be detrimental to the public welfare.
- 5. The variance, if authorized, will represent the minimum that will afford relief and will represent the least deviation possible from these regulations and from the plan." (Pages 37 & 38 of the Greensboro Zoning By-Laws).

At your DRB hearing, you will be asked to present your proposal. Please be prepared to explain why your project should be granted a variance.

Permission to Enter Property & Applicant Certification Signatures

Signature of Applicant(s)

Signing of this application authorizes the Zoning Administrator to enter onto the premises for the purpose of verifying information presented.

The undersigned hereby certifies that the information submitted in this application regarding the above property is true, accurate and complete and that I (we) have full authority to request approval for the proposed use of the property and any proposed structures. I (we) understand that any permit will be issued in reliance of the above representations and will be automatically void if any are untrue or incorrect.

This permit is void if the development under this permit is not begun within one year of the date of approval or if construction is not completed within two years.

Date

Construction may not be started until 15 days from the date of approval on this permit.
